Portfolio Summary: What This Means

Apptio was a textbook PE success: taken private at \$1.94B, transformed, and sold to IBM for \$4.6B — a ~142% return in 4.5 years. **IAS** followed a strong trajectory: acquired at ~\$850M, taken public in 2021, and now being acquired by Novacap at \$1.9B — a strong return with Vista retaining equity upside through the IPO. **CentralSquare** is an ongoing platform play — the M&A roll-up gave Vista + Bain the largest CAD/RMS market share in public safety tech, but integration complexity has been a challenge; still held. **iCIMS** attracted TA Associates as a co-equal partner in 2022, a signal of continued investor confidence in the growth trajectory; still held. Betsy's process design, CPQ/CLM, and data work directly contributed to the value creation and exit readiness of all four companies — two of which have generated or are generating strong confirmed returns.
