Visual Metadata Kit for Canva

Reusable icons, chips, metric callouts, and graphic meanings

Revenue Impact

ARR, exits, program size, monetization

Operating System

Recurring revenue, renewal flow, scalable process

PE Value Creation

M&A, portfolio operations, exit readiness

Duration / Depth

Years, industry depth, experience bands

Q2R Architecture

CRM, CPQ, CLM, ERP, data, integration graph

AI Product Studio

SaltBasin HOS, SaltTide CHI, AI-native tools

Metadata chips to preserve

Graphic guidance from attachments

Use the supplied PNG/deck as style guidance: dimensional business graphics, floating rounded callouts, large metric numerals, circuit-line accents, soft shadows, and a white-plus-navy executive palette. Do not copy stale product labels from the reference image.

Content safety rule Use SaltBasin HOS and SaltTide CHI where the older graphic references show old product naming.

Canva Prompt Addendum

Use with the two source PDFs plus this graphic guidance source

Suggested add-on prompt

- Use the attached graphic guidance source as the visual direction for Betsy Salter's resume package. Borrow the dimensional infographic style, rounded callouts, large metric hierarchy, soft shadows, circuit-line accents, and clean executive palette.
- Represent metadata visually with small icons and chips. Use revenue, operating-system, PE portfolio, duration, Q2R architecture, AI product studio, evidence, and testimonial graphics where the source PDFs provide matching proof.
- Keep the resume editable in Canva. Use the original source PDFs for content evidence and this PDF for graphic treatment.
- Use corrected product names: SaltBasin HOS and SaltTide CHI. Avoid older product labels from the guidance references.
- Maintain strong contrast: light text only on navy/dark fills, dark text only on white or pale fills.

Output recommendation

Use this guided version when Canva needs a stronger visual steer than the plain metadata companion. It is intentionally more graphic and closer to the supplied reference attachments.
