TOOLS

Recommended Canva use

Upload this companion with the two source PDFs. Ask Canva to borrow the icon language, metadata grouping, and executive color system while synthesizing the actual resume copy from the evidence documents.

Revenue Ops Spine

Quote-to-cash, order-to-cash, CPQ, CLM, billing, revenue recognition.

Transformation Engine

Discovery, requirements, process design, integrations, QA, rollout.

PE Operator Lens

Portfolio systems, M&A integration, exit readiness, ARR and value creation.

AI Product Layer

SaltBasin HOS, SaltTide CHI, tooling, data products, operator automation.

Metadata Taxonomy

What the source files are already encoding visually and structurally

Employer

Company context: Blackbaud, Accenture, Vista, TIBCO, PwC, Slalom, Salt Basin.

Industry

Domain surface area: EdTech, PE portfolio SaaS, GovTech, FinOps, HR tech, AI, healthcare.

Scenario

Use-case tags: CPQ implementation, M&A integration, exit readiness, ARR automation, AI operator.

Role

Positioning metadata: SME, lead, architect, operator, founder, advisor, project coordinator.

Metric

Quantified evidence: program size, ARR, exits, stakeholders, resources, integrations, SKUs.

Evidence

Resume language, deliverables, testimonials, project scale, role history, tool stack.

Top Case Scenarios

PE Portfolio Operations		4
AI Operator		3
PE Advisory		3
Business Process Discovery		2
CPQ Implementation		2
Exit Readiness		2
Global Rollout		2
M&A Integration		2
Manual Process Elimination		2

Skill Categories

Business Process Design		7
CRM & CPQ Implementation		4
Project & Program Management		4

Integration Design		3
Pricing Strategy & Product Cat		3

Project Industries

Education Publishing		4
AdTech / Digital Advertising M		1
AI / Private Equity / SaaS		1
Consumer Goods / CPG (Netherla		1
Data Analytics / Technology		1
DevOps / IT Operations		1
Enterprise Software (Internal		1
Financial Services / AI		1
FinOps / Technology Management		1

Design recommendation

Use icons as small metadata anchors beside bullets: revenue for quantified business impact, systems for platform architecture, process for transformation work, data for integrations and analytics, PE for portfolio value creation, and AI for Salt Basin product/operator work.

Capability And Evidence Graphic Kit

Reusable icon set, visual legend, and quantified proof cues

Revenue

Q2C, O2C, CPQ, CLM, billing, ARR, ASC606

Systems

CRM, ERP, integrations, enterprise architecture

Process

Discovery, L3 flows, requirements, rollout

Data

Migration, product data, analytics, reporting

PE Value

M&A, exit readiness, portfolio operations

AI Native

SaltBasin HOS, SaltTide CHI, product automation

Leadership

SME, advisor, team lead, operator judgment

Quality

QA architecture, dependency management, UAT

Quantified proof badges

\$50M+ program

\$60M+ program

\$500M+ ARR automated

\$1.94B to \$4.6B exit

2M+ ISBNs

25+ stakeholder surveys

12 integrations designed

6 Excel sheets eliminated

10-person team

4 Vista portfolio companies

Resume section pairing

Executive Summary	Leadership + Revenue + AI Native
Selected Impact	Revenue + PE Value + Quality
Systems Expertise	Systems + Data + Process
Portfolio Appendix	Employer + Industry + Scenario chips

Canva Prompt Addendum

Attach this page's language when asking Canva to use the visual companion

Suggested add-on prompt

Use the uploaded Visual Metadata Iconography Companion as the design vocabulary for the resume package. Do not copy it as a page layout. Borrow its executive palette, icon meanings, metadata chips, quantified proof badges, and capability-map structure.

Represent metadata visually:

- Use small line icons beside bullets to show evidence type: revenue impact, systems architecture, process design, data/integration work, PE value creation, AI-native product/operator work, leadership, and QA.
- Use compact chips for employer, industry, scenario, role, and metric metadata.
- Turn dense evidence into clean callout badges where the source files include measurable scale, ARR, program size, exits, stakeholder counts, integrations, team size, or product volume.
- Keep the tone premium, executive, precise, and non-decorative. Use white background, deep navy, muted gold, slate, and restrained green/teal accents.
- Preserve light text on dark backgrounds. Never place dark text on navy, charcoal, maroon, green, or other dark fills.

Best additional output to keep

This file should travel with the two evidence PDFs whenever Canva is asked for a polished resume, because it tells Canva how to render the metadata graphically without disturbing the source documents.
