

from thesis to defensible value

Prove the thesis. Build the evidence for what comes next.

Phase 1 tests whether LoneTree can reconstruct, reconcile and defend its fund thesis and selected PortCo value-creation claims using evidence already produced through underwriting, quarterly reporting and operating history.

PHASE 1 VALIDATION

Can LoneTree reproduce the claim?

Backtest the fund thesis and one or three PortCo cases across definition quality, lineage, reconciliation, attribution, competing drivers, evidence maturity and Cost to Produce Truth(TM).

LONG-TERM HYPOTHESIS

Can governed proof improve the fund journey?

Use the same evidence base to strengthen GP decisions, LP diligence, ongoing evidence-chain management, PortCo lead-to-cash performance and exit readiness.

A FIXED-FEE PROOF BEFORE SCALE

Choose the depth of backtest LoneTree needs.

Both options test the same hypothesis. The difference is whether LoneTree wants one focused case or a comparative three-case basis for future scale.

FOCUSED PROOF

Fund + 1 PortCo Backtest

\$25,000 12.5 SENIOR DAYS
AT \$2,000 / DAY

- Fund thesis and evidence diagnostic
- One historical PortCo value-creation claim backtest
- Claim/evidence ledger and maturity assessment
- Definition, lineage, reconciliation and attribution gap map
- Executive findings and scale recommendation

COMPARATIVE PROOF

Fund + 3 PortCo Backtests

\$35,000 17.5 SENIOR DAYS
AT \$2,000 / DAY

- Everything in the focused proof option
- Three cases across distinct value-creation patterns
- Cross-case evidence maturity and repeatability comparison
- Stronger basis for LP diligence design and managed services
- Executive findings and scale recommendation

Fixed-fee guardrail: pricing reflects senior delivery capacity. It is not based on fund size, capital raised, transaction value, successful close, investment performance or a percentage of any fund or transaction.

01

Define

Select fund thesis and cases

02

Assemble

Stage existing evidence

03

Backtest

Rebuild claims and drivers

04

Review

Test with owners

05

Decide

Scale only what holds

AFTER PHASE 1

Scale proof into the program LoneTree needs.

Phase 1 is the decision gate. LoneTree can select any future path independently or combine them around LP outreach, evidence continuity and portfolio operations.

CAPITAL FORMATION

LP Outreach Program

Build a Fund Thesis Ledger, Value-Creation Evidence Book, LP diligence evidence map, role-specific materials and evidence-based follow-up for the LP segment LoneTree chooses to engage.

EVIDENCE CONTINUITY

Evidence Chain Managed Services

Maintain definitions, claim maturity, attribution, quarterly evidence packages, diligence responses and exit readiness. Example capacity: 4 days / \$8k, 6 days / \$12k or 8 days / \$16k per month.

PORTFOLIO OPERATIONS

Lead-to-Cash + Leakage Recovery

Use the HandoverOS / PE Buyer Translation model to find pricing, contract, entitlement, billing, revenue, collections and reporting handoff gaps that create leakage or cash friction.

LP path by audience

EXISTING / RE-UP LPS	Continuity and delivery	Original fund thesis, realized and active cases, attribution, lessons learned and continuity into the next fund.
NEW INSTITUTIONAL LPS	Repeatability and governance	Disciplined sourcing and value-creation method, evidence controls, portfolio visibility and differentiated diligence proof.
CO-INVEST / STRATEGIC LPS	Deal-specific conviction	Underwriting assumptions, ownership economics, downside signals, operating milestones and permission-aware reporting.
Design-partner discount: 10% off professional fees for the first 90 days when LoneTree selects LP outreach plus either managed evidence-chain support or lead-to-cash advisory within 60 days of Phase 1. Selecting all three qualifies for 15% for the first 90 days, capped at \$15,000. No fee or discount is transaction-contingent.		

A CLEAR PATH TO LAUNCH

What LoneTree can decide and prepare now.

The fastest start is to choose the backtest depth and cases, name accountable owners and stage the existing evidence using the agreed proposal data-request categories.

1

Choose the option

\$25k fund + 1 PortCo or \$35k fund + 3 PortCos.

2

Select the cases

Choose historical cases with a material thesis, observable movement and available evidence.

3

Name the owners

Assign one GP sponsor plus finance, operating, data and reporting owners.

4

Launch the backtest

Confirm scope, access, cadence, review points and the Phase 1 decision gate.

Page 11 readiness categories

PIPELINE	Salesforce export, Excel deal tracker, target list, lender/bank tracker, fields and stage definitions.
PORTCO REPORTING	Quarterly templates, last two reporting cycles, iLEVEL exports/mappings and manual adjustment log.
FINANCE	COA, trial balance, JE detail, revenue accounts, AR, cash and debt activity.
LEAD-TO-CASH	Customers, contracts, pricing, invoices, credits, payments, renewals, churn and expansion logs.
GOVERNANCE	Owners, cadence, approvals, definitions, permissions, infrastructure constraints and recipients.
